

Impacts of Enhanced Tax Credits in Minnesota

Enhanced benefits help Minnesotans afford health insurance

- ✓ More financial help is available for eligible Minnesotans
- ✓ More middle-income Minnesotans are receiving tax credits that reduce monthly premiums
- ✓ All Minnesotans can find a plan with premiums costing no more than 8.5% of their income

The resulting lower premiums (lower costs after subsidies) have contributed to:

- ✓ Record enrollment in qualified health plans (QHPs)
- ✓ Smoother transitions to QHPs for Minnesotans coming from public health care programs
- ✓ Historic low uninsured levels in Minnesota

These enhanced tax credits are scheduled to sunset at the end of 2025 without congressional action.
